# **CREATING AN ONLINE ACCOUNT**

## CREATING AN ONLINE ACCOUNT

In order to use any of the features offered by My Water Advisor 2.0, the user must first register through the web portal. To create an account, utility customers can easily follow the steps outlined below on the My Water Advisor 2.0 online portal:

1. On a desktop computer, navigate to <https://mywateradvisor2.com/register>
2. Click on the SIGN-UP button, located on the top right of the page
3. Select either one of the following options:
  - Sign up with cell phone number OR
  - Sign up with account number

# GETTING STARTED

## GETTING STARTED

Welcome to Harmony Encore, the complete Meter Data Management System. Harmony Encore provides utility managers, employees, and customer service representatives with access to system data through a secure internet connection. This cloud-based system makes complex data easy to use and understand using reports, charts, and maps.

Thank you for considering AquaFlow Solutions Inc. as your trusted partner in meter reading systems and service. We look forward to working with you and helping you achieve unparalleled success in your water utility operations.

### SYSTEM REQUIREMENTS

The following table contains system requirements for Harmony Encore.

Requirement	Specification
Compatible Browser	Microsoft® Edge or Google Chrome
PDF Reader	Adobe® Acrobat Reader®
Display	1024 x 768 video resolution (32-bit color)
Internet Connection	High-speed internet connectivity with 10 mb/s download speed (minimum)

## LOGIN

To log in to Harmony:

1. Open your web browser.
2. Navigate to <https://harmonyencorem dm.com>
3. Sign in with your **Email Address** and **Password**.

**NOTE:** If you do not have a login, please contact your system administrator or Master Meter's Systems Technical Support team at 800.928.6388.

### Harmony Encore - Login

After logging in, you will be redirected to the Dashboard. Continue below for additional information on the Dashboard.

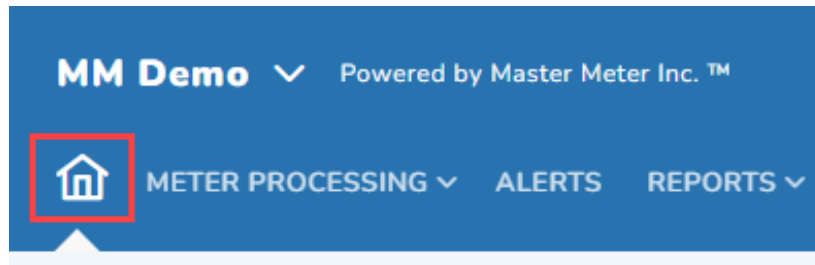

## DASHBOARD

The dashboard provides an overview through a variety of customizable graphical widgets.

**Harmony Encore - Dashboard**

Select the Home icon in the Menu Bar to return to the dashboard. The dashboard functions as the home screen.

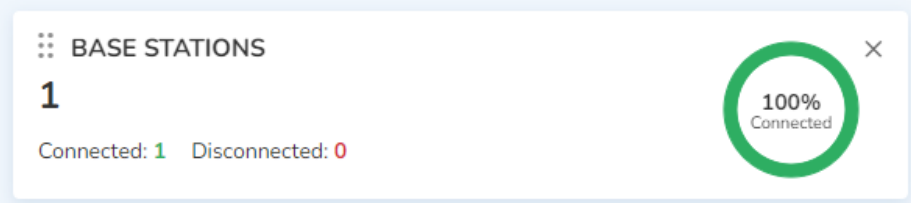

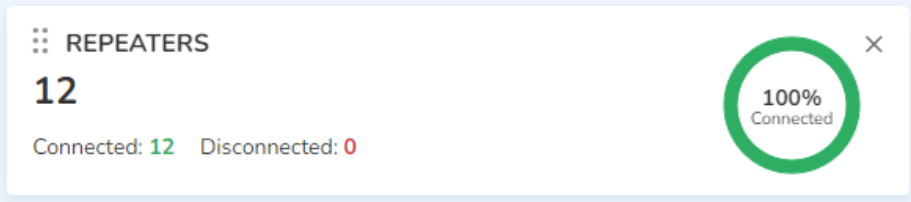

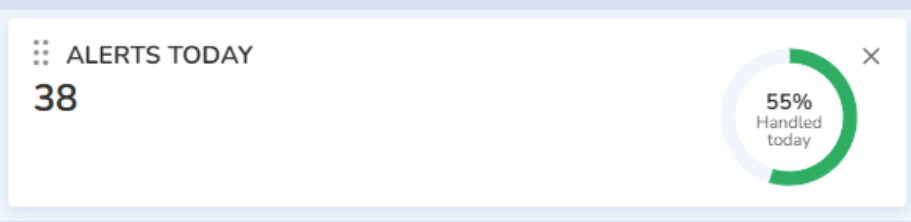

**Harmony Encore – Home Icon**

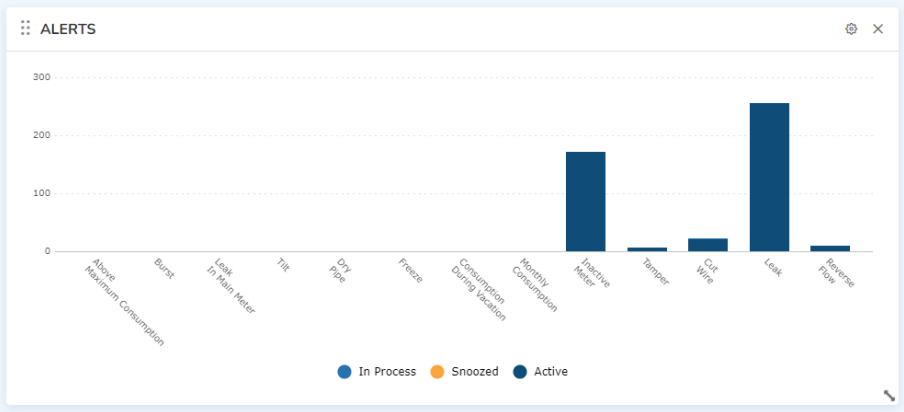

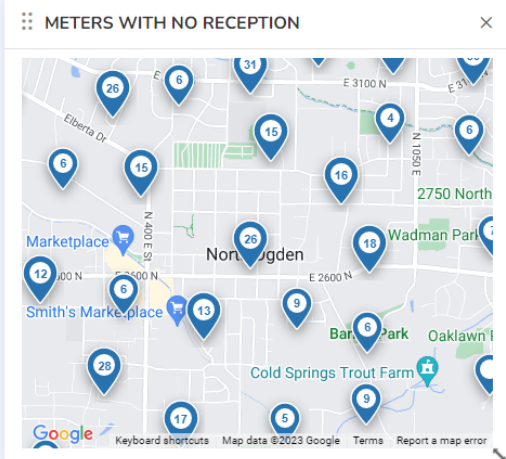

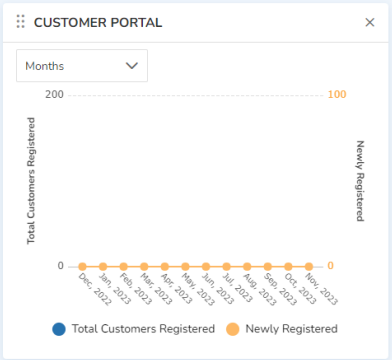

**WIDGETS**

By default, not every widget displays on the Dashboard. For instructions on how to add a widget, see [Add/Remove Widgets](#). The table below shows all available widgets.

Widget	Image
<p><b>Base Station (AMI/Fixed Network Only):</b> Displays the Base Station(s) online or offline status.</p>	 <p>The screenshot shows a widget titled 'BASE STATIONS' with a large number '1' in the center. Below the number, it says 'Connected: 1' in green and 'Disconnected: 0' in red. On the right side, there is a green donut chart that is completely filled, with '100%' and 'Connected' written inside. A small 'x' icon is in the top right corner of the widget.</p>
<p><b>Repeaters (AMI/Fixed Network):</b> Displays the Repeater(s) status and how many are online/offline. Clicking on the doughnut color provides information on the number of connected repeaters.</p>	 <p>The screenshot shows a widget titled 'REPEATERS' with a large number '12' in the center. Below the number, it says 'Connected: 12' in green and 'Disconnected: 0' in red. On the right side, there is a green donut chart that is completely filled, with '100%' and 'Connected' written inside. A small 'x' icon is in the top right corner of the widget.</p>
<p><b>Alerts Today:</b> Displays the number of alerts received in the last 24 hours. A doughnut graph represents the percentage of handled alerts.</p>	 <p>The screenshot shows a widget titled 'ALERTS TODAY' with a large number '38' in the center. On the right side, there is a donut chart that is partially filled with green, representing 55%. The text '55%' and 'Handled today' is written inside the chart. A small 'x' icon is in the top right corner of the widget.</p>

Widget	Image
<p><b>Consumption Map:</b> Provides a quick aerial view of consumption from low to high. Zooming on the map provides a closer view of consumption areas. Consumption is displayed as a relative “heat map” compared to surrounding consumers.</p>	
<p><b>Drive-By Status (AMR/Drive-By Only):</b> Displays a doughnut chart showing the number of drive-by meters read and not read in the last 30 days. Clicking on the doughnut chart displays the percentage and number of received or not received meters.</p>	
<p><b>Reception Quality (AMI/Fixed Network):</b> Displays the health of the AMI system in a doughnut chart. Received signal strength indicator (RSSI) is a measurement of the power in a received radio signal. The reception levels represent the last RSSI level received. The percentage represents the percentage of Fixed Network meters which have been read in the past 36 hours.</p>	

Widget	Image																																																								
<p><b>Alerts:</b> List the alert type, severity, and status. The alerts can be handled and customized to fit different needs.</p>	 <p>The Alerts widget displays a bar chart with the following data:</p> <table border="1"> <thead> <tr> <th>Alert Type</th> <th>In Process</th> <th>Snoozed</th> <th>Active</th> </tr> </thead> <tbody> <tr><td>Above Maximum Consumption</td><td>0</td><td>0</td><td>0</td></tr> <tr><td>Burst</td><td>0</td><td>0</td><td>0</td></tr> <tr><td>Leak In Main Meter</td><td>0</td><td>0</td><td>0</td></tr> <tr><td>Tik</td><td>0</td><td>0</td><td>0</td></tr> <tr><td>DPV Pipe</td><td>0</td><td>0</td><td>0</td></tr> <tr><td>Freeze</td><td>0</td><td>0</td><td>0</td></tr> <tr><td>Consumption During Vacation</td><td>0</td><td>0</td><td>0</td></tr> <tr><td>Monthly Consumption</td><td>0</td><td>0</td><td>0</td></tr> <tr><td>Inactive Meter</td><td>0</td><td>0</td><td>180</td></tr> <tr><td>Temper</td><td>0</td><td>0</td><td>10</td></tr> <tr><td>Cut Wire</td><td>0</td><td>0</td><td>20</td></tr> <tr><td>Leak</td><td>0</td><td>0</td><td>250</td></tr> <tr><td>Reverse Flow</td><td>0</td><td>0</td><td>10</td></tr> </tbody> </table>	Alert Type	In Process	Snoozed	Active	Above Maximum Consumption	0	0	0	Burst	0	0	0	Leak In Main Meter	0	0	0	Tik	0	0	0	DPV Pipe	0	0	0	Freeze	0	0	0	Consumption During Vacation	0	0	0	Monthly Consumption	0	0	0	Inactive Meter	0	0	180	Temper	0	0	10	Cut Wire	0	0	20	Leak	0	0	250	Reverse Flow	0	0	10
Alert Type	In Process	Snoozed	Active

Temper	0	0	10																																																						
Cut Wire	0	0	20																																																						
Leak	0	0	250																																																						
Reverse Flow	0	0	10																																																						
<p><b>Meters with no reception (AMI/Fixed Network):</b> Displays meters that have not connected to the system within 24 hrs. Clicking on each location icon zooms into the area. Zooming all the way in displays the meter electronic identification number (EID). Clicking on the meter number opens the meter card to view the information.</p>	 <p>The Meters with no reception widget shows a map of a residential area with numerous blue location pins. Each pin contains a number representing a meter ID. The map includes street names like Eiberta Dr, N 400 E St, and E 3100 N. Landmarks such as Marketplace, Smith's Marketplace, North Ogden, Wadman Park, Barlow Park, and Oaklawn are also visible.</p>																																																								
<p><b>Customer Portal:</b> Displays the total number users registered and those newly registered to use My Water Advisor. The view can be switched between days and months.</p>	 <p>The Customer Portal widget displays a line chart with the following data:</p> <table border="1"> <thead> <tr> <th>Month</th> <th>Total Customers Registered</th> <th>Newly Registered</th> </tr> </thead> <tbody> <tr><td>Dec-2022</td><td>0</td><td>0</td></tr> <tr><td>Jan-2023</td><td>0</td><td>0</td></tr> <tr><td>Feb-2023</td><td>0</td><td>0</td></tr> <tr><td>Mar-2023</td><td>0</td><td>0</td></tr> <tr><td>Apr-2023</td><td>0</td><td>0</td></tr> <tr><td>May-2023</td><td>0</td><td>0</td></tr> <tr><td>Jun-2023</td><td>0</td><td>0</td></tr> <tr><td>Jul-2023</td><td>0</td><td>0</td></tr> <tr><td>Aug-2023</td><td>0</td><td>0</td></tr> <tr><td>Sep-2023</td><td>0</td><td>0</td></tr> <tr><td>Oct-2023</td><td>0</td><td>0</td></tr> <tr><td>Nov-2023</td><td>0</td><td>0</td></tr> </tbody> </table>	Month	Total Customers Registered	Newly Registered	Dec-2022	0	0	Jan-2023	0	0	Feb-2023	0	0	Mar-2023	0	0	Apr-2023	0	0	May-2023	0	0	Jun-2023	0	0	Jul-2023	0	0	Aug-2023	0	0	Sep-2023	0	0	Oct-2023	0	0	Nov-2023	0	0

## NAVIGATION AND MENU BAR

The table below outlines the menu options. The actual items on your dashboard menu bar may vary. From any screen within Harmony Encore, you can access the menu bar items.

### Harmony Encore – Menu Bar

Section	Description
Home/Dashboard 	The Home screen displays the dashboard. The dashboard widgets provide visual overviews of important functions.
Meter Processing	The Meter Processing section contains the ability to Import & Export billing files, route data and view import/export history.
Alerts	The Alerts section lists alert events, severity, and status. The alerts can be handled and customized to fit different needs.
Reports	The Reports section provides the ability to select a variety of reports. Each report can be downloaded or emailed for ease of use and customization.
Notifications 	The Notifications Section alerts a user when a system request has been completed.
Map/GIS 	The Geographic Information System (GIS) provides the ability to view system information on a map. Selecting the map icon provides a way to view base stations, repeaters, alerts, and signal strength geographically.
Settings 	The Settings section allows administrative users to manage the system. Provides the ability to manage bridge imports, users, alert severity, and multiple other system options.

**SEARCH**

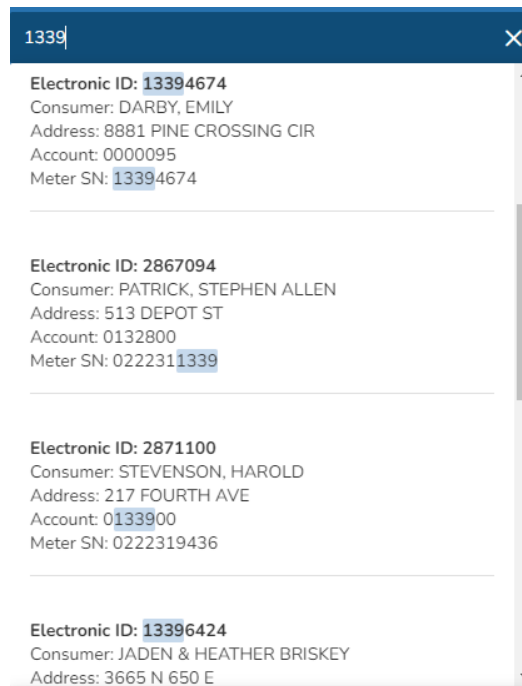

Provides the ability to search the system by customer name, location, meter number, or account number to view a customer’s meter card.

**Harmony Encore – Search Menu**

Search results start displaying after the first two characters are typed. The first 10 results will be displayed, highlighting the characters searched.

If there are more than 10 results or you need to view the results in a table view, click ‘View All’ at the bottom of the list.

[View All](#)

**Harmony Encore – View All**

**Example:**

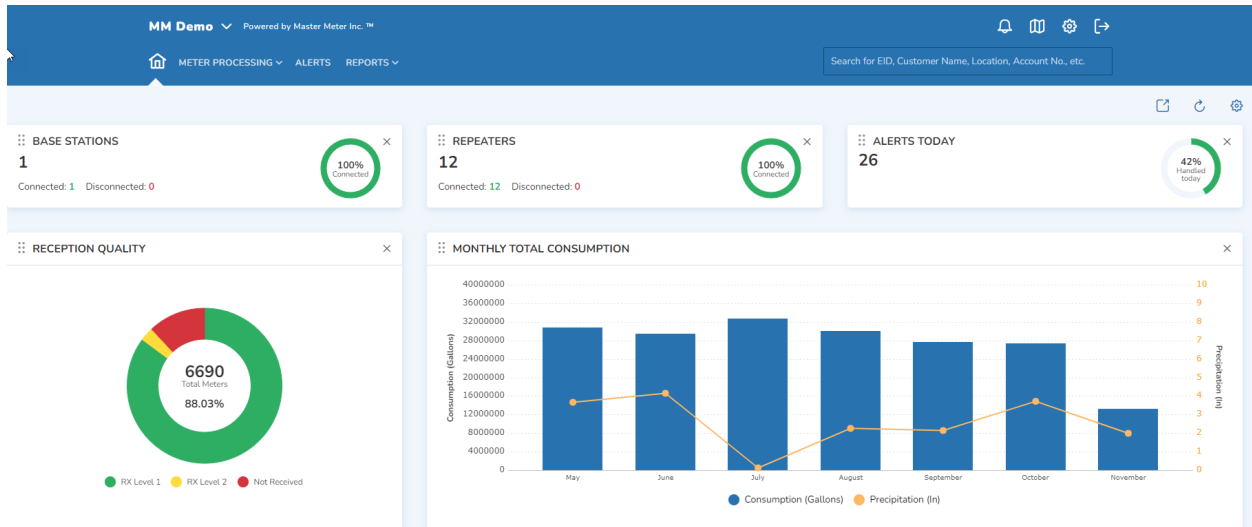

Searching for **main** returns:

- Locations on **Main** Street
- Meters at locations on **Main** Street
- Customers with service addresses on Main Street
- Customers whose name contains **main** (such as John **Maine**)

# **WIDGET CONFIGURATION**

## WIDGET CONFIGURATION

The Dashboard widgets provide overviews of important functions in one view. Each user can display the widgets they need in the order they want them. Please see the Dashboard Widgets section for a description of each widget.

**Harmony Encore – Dashboard Widgets**

Access the dashboard from any screen by clicking the Home icon.

**Harmony Encore – Home Icon**

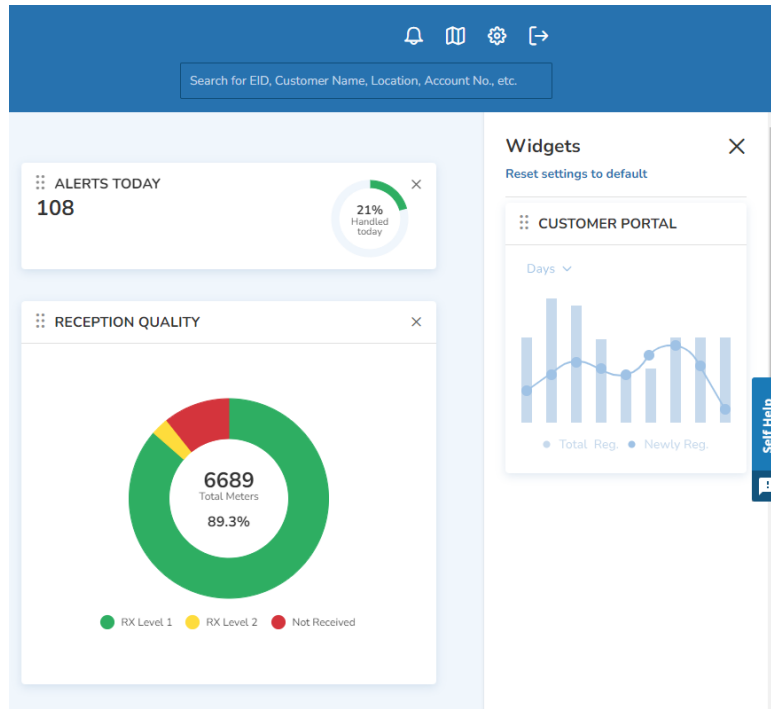

## ADD/REMOVE WIDGETS

By default, not all widgets display on the dashboard. All widgets can be added or removed.

To customize the Dashboard view:

1. To **add** widgets to the dashboard, click on the **Dashboard Settings** icon and drag the widget to the dashboard.
2. Click on a widget's **X** to remove from the dashboard (*removed widgets will be shown in the dashboard settings*).
3. To reset widgets to default view, click on **Reset settings to default**.

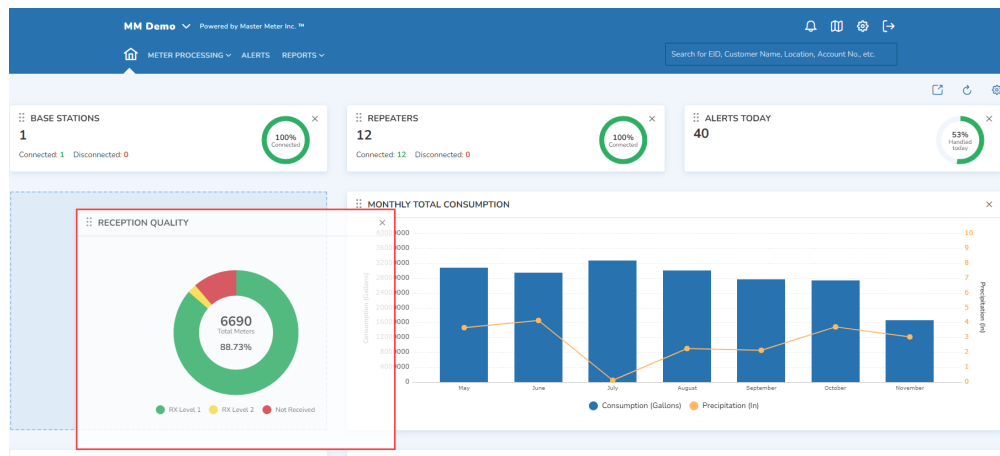

**Harmony Encore – Widget Settings**

**ARRANGING WIDGETS**

Widgets can be arranged on the Dashboard by dragging and dropping.

To customize the Dashboard:

1. **Click and hold** the top bar of the Widget.
2. **Drag and drop** the Widget to the desired location.

**Harmony Encore – Arranging Widgets**

# **PERFORMING SEARCHES**

## PERFORMING SEARCHES

### GLOBAL SEARCH

You can use Global Search to search for a specific item, such as a customer, location, meter, or account number.

**NOTE:** Meters that have been removed do not display in Global Search.

#### To use Global Search:

1. In the search box at the top right of the page, enter the word, number, or phrase to locate.

**Harmony Encore – Search Box**

As you type, the top ten matches automatically display in a list below the search box.

2. If the item is displayed, select it from the displayed results to view its meter card.
3. If the item is not displayed, view additional results by selecting **'View All'**.

**Example** Searching for **main** returns:

- Locations on **Main** Street
- Meters at locations on **Main** Street
- Customers with service addresses on **Main** Street
- Customers whose name contains **main** (such as John **Maine**)

# **USING METER CARDS AND METERS**

## USING METER CARDS AND METERS

The meter is the central device in Harmony Encore. Meters must be added to the software before any readings can be saved in the system. The meters are linked to customer and location information provided by your billing or Customer Information System (CIS). Each meter in the system has a Meter Card that displays details about the meter.

### METER CARD

Customer service representatives can use the meter card to locate or verify customer information. For example, a customer service representative can look at consumption details for that specific meter/account. If a customer has a consumption question, a customer service representative can use the Meter Card to research the details.

### METER CARD FIELDS AND SECTIONS

The following table provides descriptions for the account detail fields on the Meter Card.

Field	Description
<b>Customer Name</b>	The customer's name on the account associated with the meter (displayed on the top left of the meter card.)
<b>AMR or AMI</b>	The type of meter associated with the account
<b>Customer Acct. No.</b>	The account number associated with the customer or meter
<b>Service Address</b>	The address associated with the meter
<b>Route Number</b>	The meter's associated route
<b>Email</b>	Customer's email address associated to the meter
<b>Phone</b>	Customer's phone number associated to the meter
<b>Electronic ID</b>	Meter's electronic identification <a href="#">number</a> (EID)
<b>Meter SN</b>	Serial number of the meter
<b>Service Start Date</b>	The date service started for this account/meter
<b>Last Read Date</b>	The date and time of the last meter read
<b>Last Read (Units)</b>	Latest reading from the meter
<b>Current Active Alerts</b>	Displays any active alerts for the meter (if applicable)

The following table describes the sections on the bottom half of each Meter Card.

Section	Description
<b>Consumption</b>	Displays the consumption data for the meter in table and chart formats
<b>Alerts</b>	Displays any alerts for the meter and the sent messages details (if applicable)
<b>Meter Details</b>	Displays the Specifications, Timeline, and Read Setup of the meter
<b>More Acct. Details</b>	Displays more details about the account including Comments, Meter History, Location Notes, and Meter Pictures
<b>Related Entities</b>	Displays the Meter Group(s) that a meter is included in
<b>Customer Portal</b>	Displays the customer's My Water Advisor information for this meter

## CONSUMPTION

The Consumption section of the Meter Card displays the consumption data for the meter. The consumption data can be viewed in a table, bar graph, or line graph.

**Harmony Encore – Consumption Data**

The default views for the Meter Card's consumption data are as follows:

### AMI/Fixed Network

- **Date Range:** Past Month
- **Read Frequency:** Daily
- **View:** Column Graph

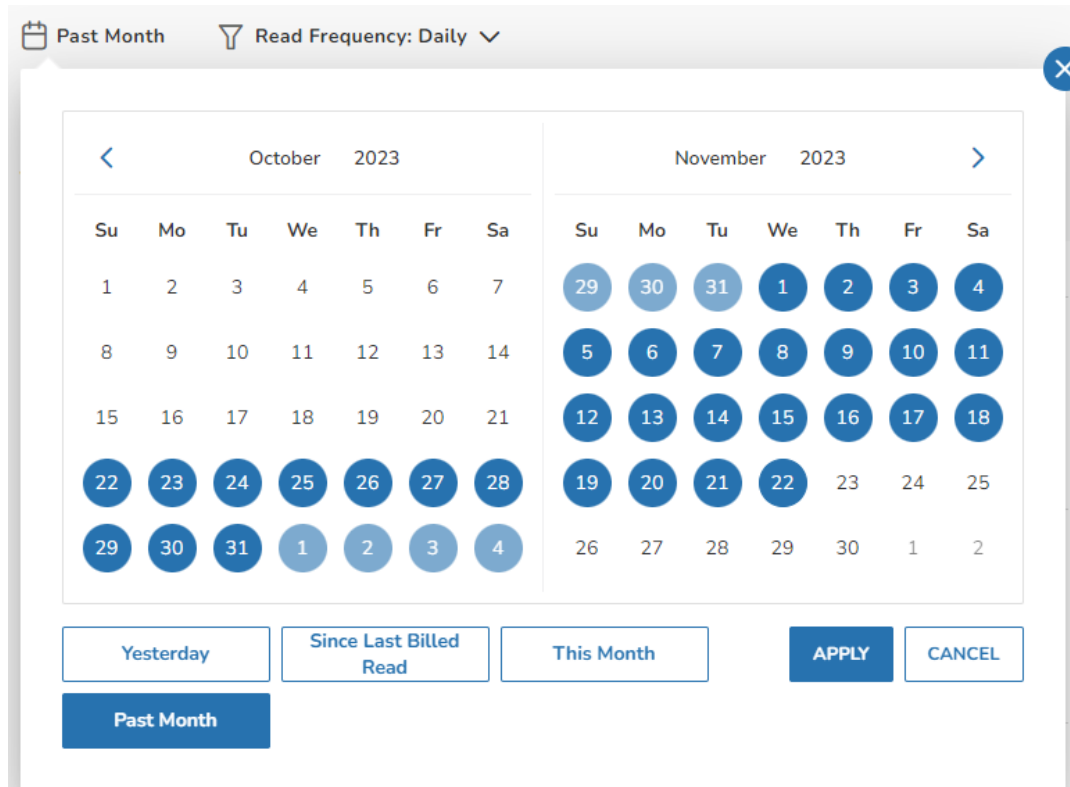

### AMR/Drive-by

- **Date Range:** Last 13 Months
- **Read Frequency:** Monthly
- **View:** Column Graph

Date Range, Read Frequency, and View can be adjusted to display the needed consumption data.

### Date Range

Adjust the date range by clicking the calendar icon on the top left side of the consumption section of the Meter Card. Set the date range for the dates to view and click apply.

**Harmony Encore – Data Range**

### Read Frequency

Adjust the read frequency by clicking the filter icon on the top left side of the Consumption section of the Meter Card to the right of the Date Range.

**Harmony Encore – Read Frequency**

The selections for Read Frequency are as follows:

- Monthly
- Daily
- Hourly
- All Reads Data

### View Format

Data can be viewed in various formats which include table, column graph, or line graph by simply clicking on the icon. Hoovering over the icon gives the view type.

**Harmony Encore – View Format**

### Column Settings, Exporting, and Advanced Search

Column Settings, Exporting, and Advanced Search are only available in Table view. These options are located at the top right of the meter's consumption data table.

**Harmony Encore – Table View Settings**

Column Settings  allows you to add/remove columns in the table and designate them as either Primary or Secondary columns.

There are 3 exporting options: Excel , Email , and PDF . Excel will export and download the Primary columns in a .xlsx format.

Consumption Date	Read (Gallons)	Consumption (Gallons)	Last Read Time	Alert Type	Read Method
09/18/2023		535338	5 09/18/2023		Fixed Network
09/17/2023		535333	678 09/17/2023		Fixed Network
09/15/2023		534655	37 09/15/2023		Fixed Network
09/14/2023		534618	127 09/14/2023		Fixed Network
09/13/2023		534491	1606 09/13/2023		Fixed Network
09/6/2023		532885	15 09/6/2023		Fixed Network
09/5/2023		532870	264 09/5/2023		Fixed Network
09/4/2023		532606	201 09/4/2023		Fixed Network
09/3/2023		532405	176 09/3/2023		Fixed Network
08/25/2023		529055	288 08/25/2023		Fixed Network
08/24/2023		528767	1209 08/24/2023		Fixed Network
08/21/2023		527558	3505 08/21/2023		Fixed Network

**Harmony Encore – .xlsx Export**

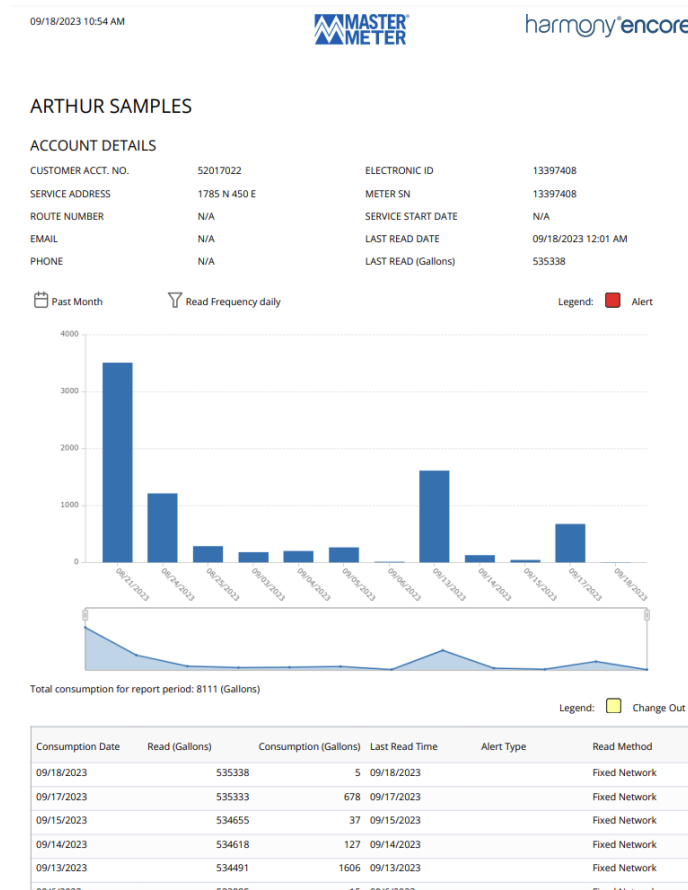

Email will allow you to enter the recipient's email address to email the report in a PDF or CSV format.

**Harmony Encore – Email Export**

PDF will export and download the primary columns in a .pdf format

**Harmony Encore – PDF export**

Advanced Search allows you to filter the report based on certain criteria you set. This allows you to narrow down the data to display exactly what you need. The example below shows using Advanced Search to only show days with Consumption greater than 500 Gallons.

**Harmony Encore – Advanced Search**

**ALERTS**

The Alerts section of the Meter Card displays the alerts (active and/or archived) for the meter, and the sent message details if an email and/or text message was sent out from Harmony Encore for an alert.

Consumption **Alerts** Meter Details More Acct. Details Related Entities Customer Portal

**METER DETAILS**

The Meter Details section of the meter card will display the Meter Specifications, Read Setup, Meter Timeline, and Meter Connectivity.

The screenshot shows the 'Meter Details' section of the application. At the top, a navigation bar includes 'Consumption', 'Alerts', 'Meter Details' (highlighted), 'More Acct. Details', 'Related Entities', and 'Customer Portal'. The main content area is divided into four sections:

- METER SPECIFICATIONS:** UNIT TYPE: Allegro 4GBL / UT-21; METER SIZE: N/A; MANUFACTURER: N/A; MODEL: N/A; FACTOR: 1; LONGITUDE: -111.96683; LATITUDE: 41.29063
- READ SETUP:** PREVIOUS BILLED READ (GALLONS): 517622; LAST READ (GALLONS): 534522; READ DEVICE: 1127683; DEVICE TYPE: Repeater; READ METHOD: Fixed Network; MESSAGE TO OFFICE: N/A
- METER TIME LINE:** INSTALLATION DATE: N/A; PURCHASE DATE: N/A; REMOVAL DATE: N/A
- METER CONNECTIVITY - ONLINE:** A green bar indicating the meter is online.

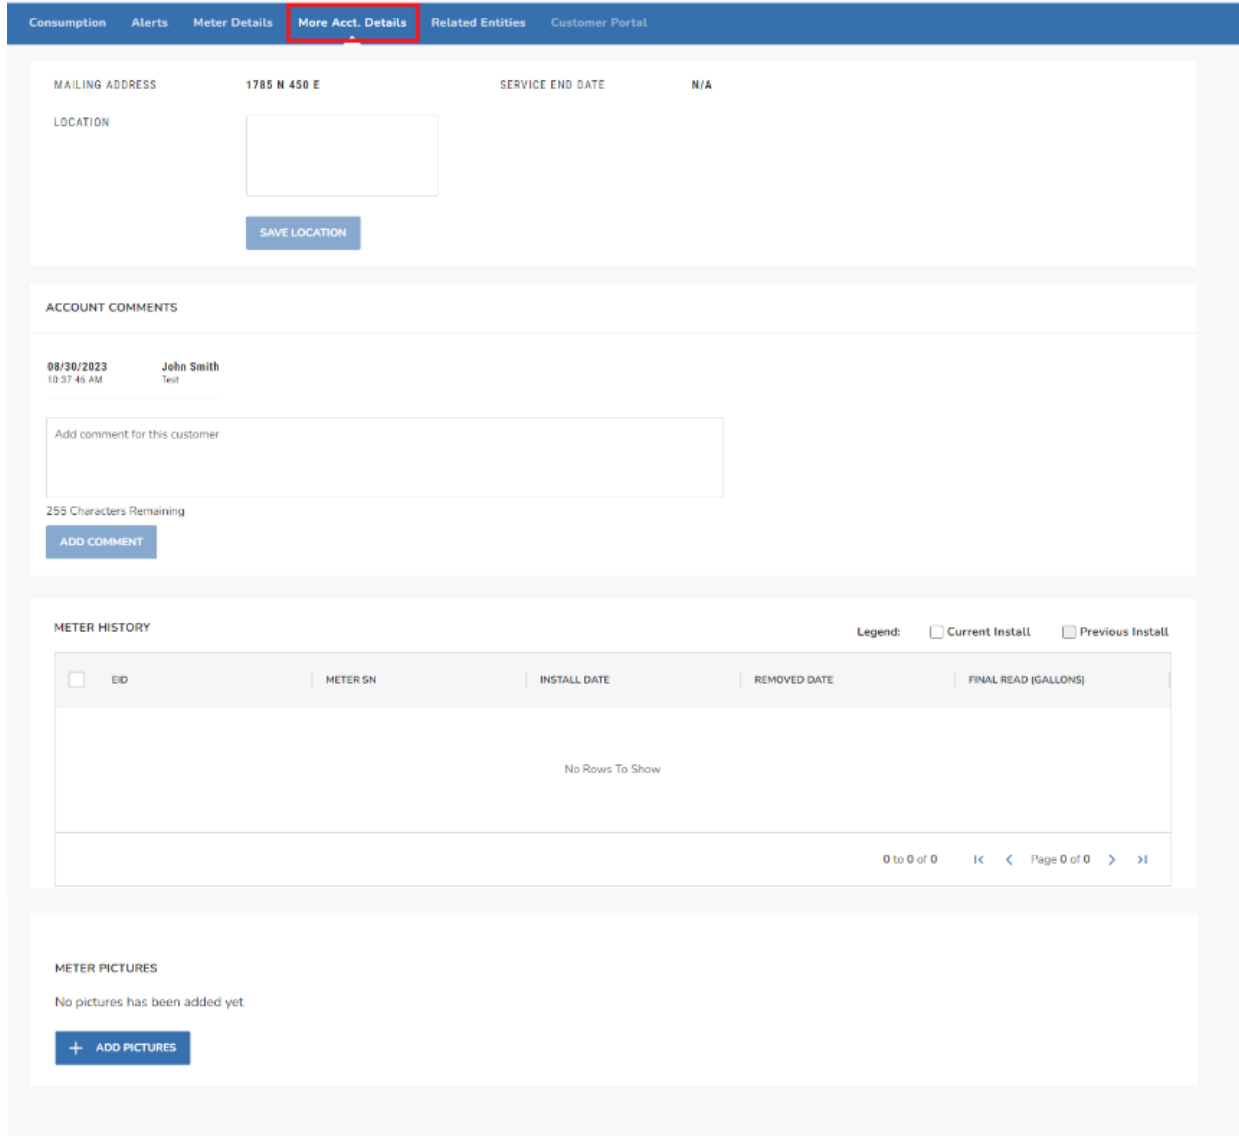

**Harmony Encore – Meter Details**

The following table provides descriptions of the fields under Meter Details.

Field	Description
<b>Unit Type</b>	Type of meter
<b>Meter Size</b>	Size of the meter
<b>Manufacturer</b>	The manufacturer of the meter
<b>Model</b>	Model of the meter
<b>Factor</b>	The factor that is set on the meter
<b>Longitude/Latitude</b>	The geocoded/provided longitude and latitude of the meter <i>Note: This can come from different sources and may not be exact.</i>
<b>Installation Date</b>	The date the meter was installed
<b>Purchase Date</b>	The date the meter was purchased
<b>Removal Date</b>	The date the meter was removed
<b>Previous Billed Read</b>	Previously billed consumption in gallons
<b>Last Read</b>	Most current reading recorded for the meter
<b>Read Device</b>	The device name/ID the recorded the last read
<b>Device Type</b>	The type of device that recorded the last read
<b>Read Method</b>	The method the last read was recorded
<b>Message to Office</b>	The message input by the meter reader in Harmony Mobile during last read

**MORE ACCT. DETAILS**

The More Acct. Details section of the meter card will display the Location Notes, Account Comments, Meter History, and Meter Pictures.

**Harmony Encore – More Acct. Details**

The **Mailing Address** and **Service End Date** will be displayed under More Acct. Details in the Meter Card.

The **Location** note box gives you the ability to add/update any Location notes describing the property or the location of the meter on the property. Location notes are synced between Harmony Encore and Harmony Mobile. Type in the text box to add/edit any Location notes and click 'Save Location' to save. (Each account/meter only has 1 Location notes field.)

The **Account Comments** section allows you to add any comments about the account/meter for future reference. Each comment is timestamped with the date and time the comment was created along with the username of the user who created the comment and the comment itself. (Comments are a maximum of 255 characters).

To add a comment, type in your comment in the comment textbox and click '**Add Comment**'.

The **Meter History** section will display any installations/removals/changeouts regarding the meter.

The columns displayed are as follows:

- EID
- Meter SN
- Install Date
- Removed Date
- Final Read

The Meter Pictures section allows you to add/view/edit pictures regarding the account/meter.

To add a picture:

1. Click the '**+ Add Pictures**' button
2. Click the '**+ Upload File**' button
3. Navigate to the location on your computer with the picture (.jpg, .png) you want to upload
4. Upload the picture
5. (Optional) Add any comments for the picture
6. Click '**Save**'

Once saved you will now see the image and image details in the Meter Pictures table. The table includes the following columns:

- Image
- Comments
- Uploaded On
- Uploaded By
- Date Taken

You can click the pencil icon  to the right of the table row and that will bring up the edit window to edit the comment or delete the picture.

**RELATED ENTITIES**

The **Related Entities** section displays the **Meter Groups**.

**Meter Groups** displays any Groups this account/meter may belong to. The Meter Groups table includes the columns:

- Group Name
- Group Type
- Meter Role

GROUP NAME	GROUP TYPE	METER ROLE
Irrigation	Read Group	Sub meter

**Harmony Encore – Related Entities**

# **RUNNING REPORTS**

## RUNNING REPORTS

Reports show trends and issues in a meter or group of meters. Harmony Encore can run many types of reports, by selecting Reports in the top navigation menu.

Harmony Encore reports are highly customizable. You can filter, sort by columns, add/remove columns, and rearrange the columns all based on your preferences to give you the data you need.

You will notice Harmony Encore reports are designed to be consistent throughout Harmony Encore and user-friendly. Most reports have the same options in the same locations.

### Search By

Search By is the initial criteria you need to set to run a report. Search By is the initial filter set to give only the meters or accounts to view on the report.

**Harmony Encore – Search By**

### Date Range

The Date Range can be adjusted by clicking the calendar icon on the top left side of the report. Set the Date Range for the data you want to view and click Apply. The Time Range may be included in some reports as well.

**Harmony Encore – Date Range**

### View

The View can be adjusted by clicking one either the Table icon or View on Map.

**Harmony Encore - View**

### Column Settings, Exporting, and Advanced Search

Column Settings, Exporting, and Advanced Search are only available in Table view. These options are located at the top right of the meter's consumption data table.

#### Harmony Encore – Table View Settings

**Column Settings**  allows you to add/remove columns in the table and designate them as either Primary or Secondary columns.

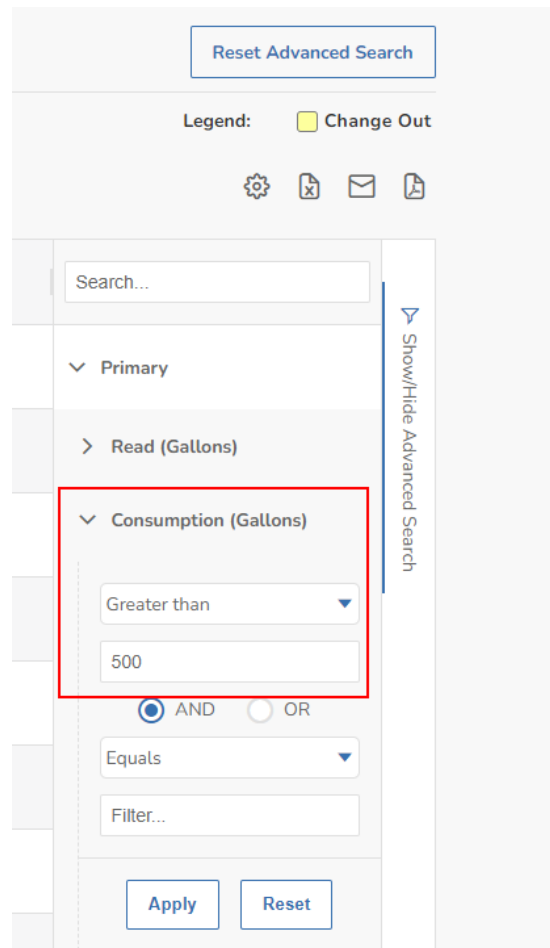

There are 3 exporting options: **Excel**  , **Email**  , and **PDF**  .

**Excel** will export and download the Primary columns in a .xlsx format.

**Email** will allow you to enter the recipient's email address to email the report in a PDF or CSV format.

**PDF** will export and download the Primary columns in a .pdf format.

**Advanced Search** allows you to filter the report based on certain criteria you set. This allows you to narrow down the data to display exactly what you need. The example below shows using Advanced Search to only show Consumption greater than 500 Gallons.

**Harmony Encore – Advanced Search: Consumption**

Reports in Harmony Encore include:

**Consumption**

- [Consumption](#)
- [Consumption for Period](#)
- [Consumption for Group](#)
- [Inactive with Consumption](#)

**Meter Reads**

- [Meter List](#)
- [Meter Reads](#)
- [Unread Meters](#)
- [Hi/Low Reads](#)
- [Static Meters](#)
- [Manual Reads Only](#)

**Infrastructure**

- [Meter Change Outs](#)
- [Duplicate Meters](#)

**CONSUMPTION**

The Consumption section of Reports includes several different reports you can run for consumption data. The reports include Consumption, Consumption for Period, Consumption for Group, and Inactive with Consumption.

**CONSUMPTION REPORT**

The Consumption Report will display the consumption for a date range in certain intervals and/or total. For example, use this report if to view the monthly consumption for each of the previous 3 months or the total for those 3 months in a specific route.

The screenshot shows the 'Consumption' report interface. At the top, there are navigation tabs: 'Consumption', 'Consumption for Period', 'Consumption for Group', and 'Inactive with Consumption'. Below the tabs is a search bar with 'Search by All' and a date range '07/1/2023 - 09/25/2023'. The interval is set to 'Month'. There is an 'Advanced Search' button. Below the search bar, there are view options (grid, list) and a 'VIEW ON MAP' button. The main content is a table with the following data:

<input type="checkbox"/>	ELECTRONIC ID	METER SN	ACCOUNT NO.	CUSTOMER NAME	PROPERTY ADDRESS	JULY/2023	AUGUST/20...	SEPTEMBER...	TOTAL ↓

**Harmony Encore – Consumption Report**

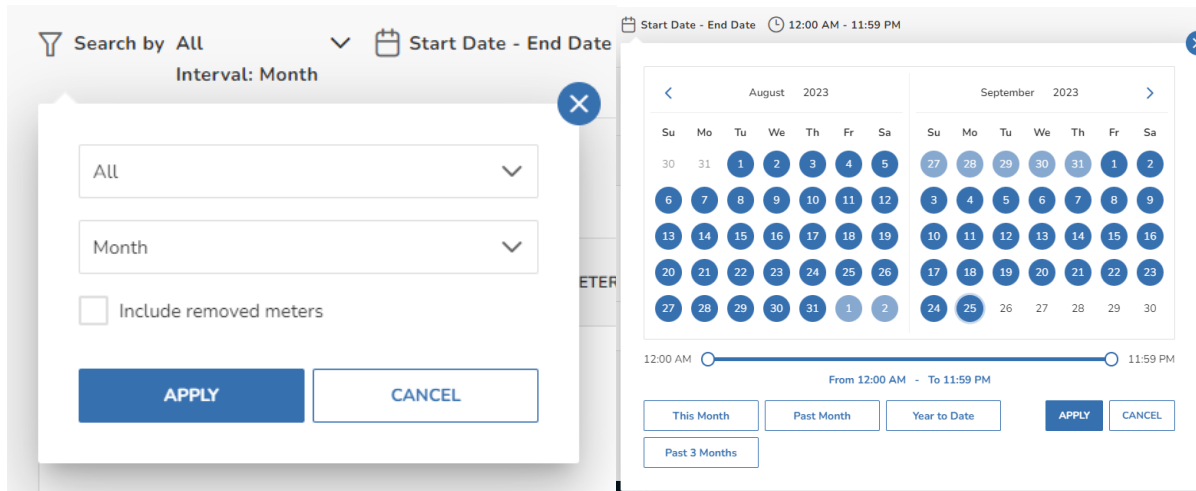

The totals for each consumption Interval and Total will be displayed at the bottom of the Consumption Report.

The Consumption Report will display 20 rows at a time, and you can switch pages at the bottom of the report.

To generate a **Consumption Report**:

1. Go to **Reports > Consumption**
2. The default selection should be the **Consumption Report**
3. Click **Search By**
4. Select the parameter you want to **Search By** in the drop-down list

5. Select the **Interval** in the drop-down list
6. (Optional) Check/uncheck 'Include removed meters' box
7. Click **Apply**
8. Enter the **Date Range** for the report by selecting dates on the calendar or using the quick options 'This Month', 'Past Month', 'Year to Date', or 'Past 3 Months'
9. (Optional) Select the **Time Range** if you want to only view consumption in between certain times
10. Click **Apply**

**Harmony Encore – Apply Changes**

Search by options available are as follows:

- All
- Route
- Meter Group
- Billing Cycle
- Meter Size
- Unit Type

Intervals available are as follows:

- Date
- Week
- Month
- Year
- Total Only

You can also check or uncheck 'Include removed meters'.

The following table provides descriptions of the fields available as columns in the Consumption Report.

Field	Description
<b>Electronic ID</b>	The Electronic ID of the meter
<b>Meter SN</b>	The serial number of the meter
<b>Account No.</b>	The account number associated with the meter
<b>Customer Name</b>	The customer's name on the account associated with the meter
<b>Property Address</b>	The address of the property associated with the meter (also known as the Service Address)
<b>Routes</b>	The route(s) associated with the meter
<b>Meter Sizes</b>	Size of the meter
<b>Installation Date</b>	The date the meter was installed
<b>Read Method</b>	The method the last read was recorded
<b>Base Station (Fixed Only)</b>	The Base Station ID the meter is registered to
<b>Repeater (Fixed Only)</b>	The Repeater ID the meter is registered to

The Advanced Search options available are:

- Total Consumption

### CONSUMPTION FOR PERIOD REPORT

The Consumption for Period Report will display the consumption for a date range with consumption and read data. An example would be if you wanted to see the consumption for a specific date to date.

### **Harmony Encore – Consumption for Period Report**

The total consumption for the report will be displayed at the bottom of the Consumption Report.

The Consumption for Period Report will display 20 rows at a time, and you can switch pages at the bottom of the report.

To generate a **Consumption for Period Report**:

1. Go to **Reports > Consumption**
2. Select **Consumption for Period** at the top of the Consumption section
3. Click **Search By**
4. Select the parameter you want to **Search By** in the drop-down list
5. Click **Apply**
6. Enter the **Date Range** for the report by selecting dates on the calendar or using the quick options 'This Month', 'Past Month', 'Year to Date', or 'Past 3 Months'
7. Click **Apply**

**Harmony Encore – Apply Changes**

Search by options available include the following:

- All
- Route
- Meter Group

The following table provides descriptions of the fields available as columns on the Consumption for Period Report.

Field	Description
<b>EID</b>	The Electronic ID of the meter
<b>Acct. No.</b>	The account number associated with the meter
<b>Route</b>	The route associated with the meter
<b>Consumption</b>	The total consumption for the date range selected
<b>Customer Name</b>	The customer's name on the account associated with the meter
<b>Address</b>	The address of the property associated with the meter (also known as the Service Address)
<b>Start Date</b>	The start date of the report
<b>Last Read Time</b>	The date and time of the last meter read
<b>Start Read</b>	The first meter read from the start date of the report
<b>Last Read</b>	Most current reading recorded for the meter

The Advanced Search options available are:

- Consumption

### CONSUMPTION FOR GROUP REPORT

The Consumption for Report will display the consumption for a Meter Group in certain intervals and/or total. This report will also calculate Non-Revenue Water (NRW), the main meter consumption minus the child meter's consumption, if applicable. An example would be if you wanted to see the NRW of a Meter Group you have set up in Harmony Encore with a Main Meter and its Meters for a certain date range.

### Harmony Encore – Consumption for Group Report

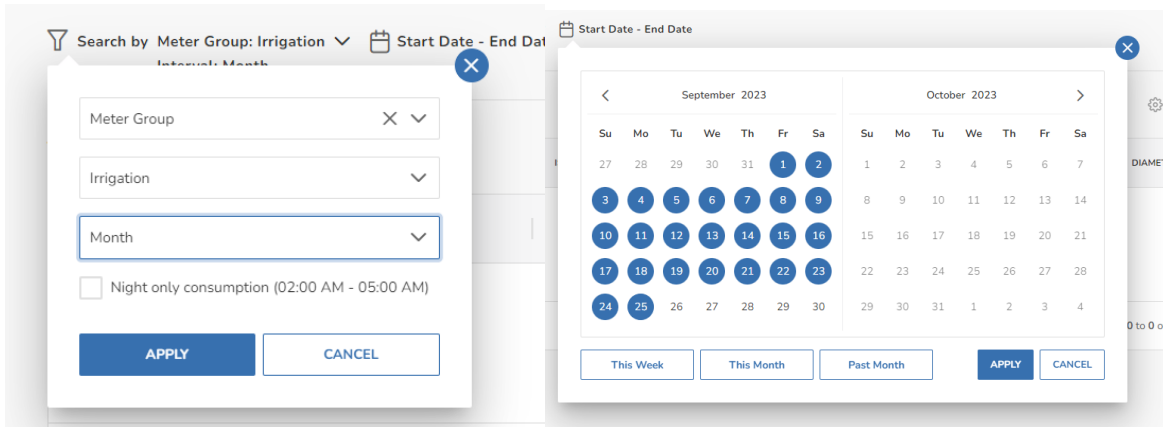

The Main Meter and Child Meter(s) totals for each consumption Interval and Total will be displayed at the bottom of the Consumption Report. The NRW and NRW % will also be displayed if applicable.

The Consumption for Group Report will display 20 rows at a time, and you can switch pages at the bottom of the report.

To generate a **Consumption for Group Report**:

1. Go to **Reports > Consumption**
2. Select **Consumption for Group** at the top of the Consumption section
3. Click **Search By**
4. Select the parameter you want to **Search By** in the drop-down list
5. Select the **Interval** in the drop-down list
6. Click **Apply**
7. Enter the **Date Range** for the report by selecting dates on the calendar or using the quick options 'This Week', 'This Month', or 'Past Month'.
8. Click **Apply**

**Harmony Encore – Apply Changes**

Search by options available include the following:

- Meter Group
- 

Intervals available include the following:

- Date
- Week
- Month
- Year
- Total Only

The following table provides descriptions of the fields available as columns in the Consumption for Group Report.

Field	Description
<b>EID</b>	The Electronic ID of the meter
<b>Is main?</b>	Displays if the meter is designated as a Main Meter (True or False)
<b>Meter SN</b>	The serial number of the meter
<b>Customer Name</b>	The customer's name on the account associated with the meter
<b>Address</b>	The address of the property associated with the meter (also known as the Service Address)
<b>Diameter</b>	The diameter of the meter
<b>Customer ID</b>	The Account Number associated with the customer/meter
<b>Billing Cycle</b>	The Billing Cycle of the meter
<b>Meter Type</b>	The type of meter (Water/Gas)
<b>Install Date</b>	The date the meter was installed
<b>Alerts</b>	Any alerts currently active for the meter
<b>Last Read Date</b>	The date and time of the last meter read
<b>Last Read</b>	Most current reading recorded for the meter
<b>Route</b>	The route associated with the meter

### INACTIVE WITH CONSUMPTION REPORT

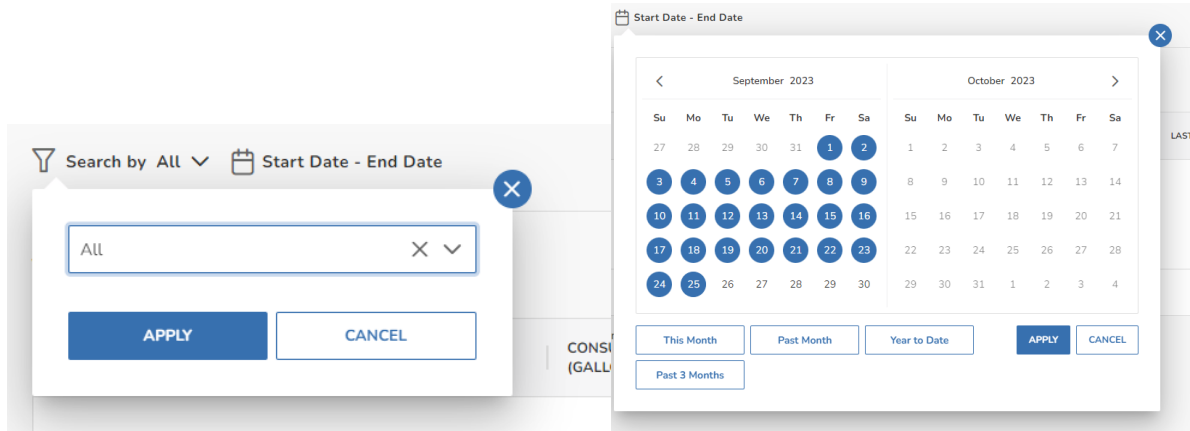

The Inactive with Consumption Report will display the inactive meters that recorded consumption for a date range. Use this report to detect unauthorized water usage.

The total consumption for the report will be displayed at the bottom of the Consumption Report.

The Inactive with Consumption Report will display 20 rows at a time, and you can switch pages at the bottom of the report.

To generate an **Inactive with Consumption Report**:

1. Go to **Reports > Consumption**
2. Select **Inactive with Consumption** at the top of the Consumption section
3. Click **Search By**
4. Select the parameter you want to **Search By** in the drop-down list
5. Click **Apply**
6. Enter the **Date Range** for the report by selecting dates on the calendar or using the quick options 'This Month', 'Past Month', 'Year to Date', or 'Past 3 Months'
7. Click **Apply**

**Harmony Encore – Apply Changes**

Search by options available include the following:

- All
- Route
- Meter Group

The following table provides descriptions of the fields available as columns in the Inactive with Consumption Report.

Field	Description
<b>EID</b>	The Electronic ID of the meter
<b>Meter SN</b>	The serial number of the meter
<b>Customer Acct. No.</b>	The Account Number associated with the customer/meter
<b>Customer Name</b>	The customer's name on the account associated with the meter
<b>Location Number</b>	The Account Number associated with the customer/meter
<b>Address</b>	The address of the property associated with the meter (also known as the Service Address)
<b>Consumption</b>	The total consumption for the date range selected
<b>Start Date</b>	The start date of the report
<b>Start Read</b>	The first meter read from the start date of the report
<b>Last Read Date</b>	The date and time of the last meter read
<b>Last Read</b>	Most current reading recorded for the meter
<b>Route</b>	The route associated with the meter

**METER READS**

The Meter Reads section of Reports includes several different reports you can run for meter and reads data. The reports include Meter List, Meter Reads, Unread Meters, Hi/Low Reads, Static Meters, and Manual Reads Only.

### METER LIST REPORT

The Meter List Report will display a list of the meters in your system based on the selected criteria. This is the most common report to run for meter information.

The Meter List Report will display a list of the meters in your system based on the selected criteria. This is the most common report to run for meter information.

The screenshot shows the 'Meter List' report interface. At the top, there are navigation tabs: 'Meter List' (highlighted with a red box), 'Meter Reads', 'Unread Meters', 'Hi/Low Reads', 'Static Meters', and 'Manual Reads Only'. Below the tabs is a search bar with 'Search by All' and buttons for 'Assign meters to group' and 'Advanced Search'. A 'View' section shows a grid icon. The main content is a table with the following data:

**Harmony Encore – Assign Meters to Group**

The Meter List Report will display 20 rows at a time, and you can switch pages at the bottom of the report. If there are over 10,000 meters then the first 10,000 meters will be displayed and a .CSV file will be generated to view all meters.

To generate a **Meter List Report**:

1. Go to **Reports > Meter Reads**
2. The default selection should be the **Meter List Report**
3. Click **Search By**
4. Select the parameter you want to **Search By** in the drop-down list
5. (Optional) Check/uncheck 'Include removed meters' box
6. Click **Apply**

**Harmony Encore – Apply Changes**

Search by options available include the following:

- All
- Billing Cycle
- Route
- Model
- Unit Type
- Property Address
- Meter Size
- Meter ID
- Meter SN
- EID
- Base Station ID
- Repeater ID
- Customer Name
- Old Meter Number
- Meter Group

The following table provides descriptions of the fields available as columns in the Meter List Report.

Field	Description
<b>Electronic ID</b>	The Electronic ID of the meter
<b>Meter SN</b>	The serial number of the meter
<b>Account No.</b>	The Account Number associated with the customer/meter
<b>Customer Name</b>	The customer's name on the account associated with the meter
<b>Property Address</b>	The address of the property associated with the meter (also known as the Service Address)
<b>Last Read</b>	Most current reading recorded for the meter
<b>Last Read Time</b>	The date and time of the last meter read
<b>Route Number</b>	Route number associated with the meter
<b>Email</b>	Email address of the customer associated with the meter
<b>Phone</b>	Phone number of the customer associated with the meter
<b>Service Start Date</b>	The date service started for this account/meter
<b>Meter Size</b>	Size of the meter
<b>Manufacturer</b>	The manufacturer of the meter
<b>Model</b>	Model of the meter
<b>Factor</b>	The factor that is set on the meter
<b>Longitude</b>	The geocoded/provided longitude of the meter
<b>Latitude</b>	The geocoded/provided latitude of the meter
<b>Installation Date</b>	The date the meter was installed
<b>Removal Date</b>	The date the meter was removed
<b>Previous Billed Read</b>	The previous read that was billed for the meter
<b>Repeater ID (Fixed Only)</b>	The Repeater ID the meter is registered to
<b>Read Device</b>	The device name/ID the recorded that last read
<b>Device Type</b>	The type of device that recorded the last read
<b>Read Method</b>	The method the last read was recorded
<b>Message To Office</b>	The message input by the meter reader in Harmony Mobile during last read
<b>Service End Date</b>	The date service ended for this account/meter
<b>Route Name</b>	The route associated with the meter
<b>Base Station (Fixed Only)</b>	The Base Station ID the meter is registered to
<b>Last Name</b>	The last name of the customer associated with the meter
<b>First Name</b>	The first name of the customer associated with the meter
<b>No. Of Pictures</b>	The number of pictures uploaded for the account/meter
<b>Consumption</b>	The total consumption for the date range selected

### Harmony Encore – Meter Reads Report

The Meter Reads Report will display 20 rows at a time, and you can switch pages at the bottom of the report.

To generate a **Meter Reads Report**:

1. Go to **Reports > Meter Reads**
2. Select the **Meter Reads Report** at the top of the Meter Reads section
3. Click **Search By**
4. Select the parameter you want to **Search By** in the drop-down list
5. (Optional) Check/uncheck the 'Show only last read' box
  - a. If you uncheck the 'Show only last read' box, you will need to enter a Date Range  
*Note: If your system is an AMI/Fixed Network system, then you can only select a date range of 2 days.*
6. Click **Apply**

#### Harmony Encore – Apply Changes

Search by options available include the following:

- Route
- Meter
- Meter Group

The following table provides descriptions of the fields available as columns in the Meter Reads Report.

Field	Description
<b>Electronic ID</b>	The Electronic ID of the meter
<b>Meter SN</b>	The serial number of the meter
<b>Account No.</b>	The account number associated with the meter
<b>Customer Name</b>	The customer's name on the account associated with the meter
<b>Address</b>	The address of the property associated with the meter (also known as the Service Address)
<b>Read Time</b>	The date and time of the meter read
<b>Read</b>	The reading recorded for the meter
<b>Consumption</b>	The total consumption for the date range selected
<b>Routes</b>	The route(s) associated with the meter
<b>Location Number</b>	The account number associated with the meter
<b>Route Numbers</b>	Route number associated with the meter
<b>Message to Office</b>	The message input by the meter reader in Harmony Mobile during last read
<b>Read Method</b>	The method the read was recorded
<b>Read Device</b>	The device name/ID that recorded the read

The Advanced Search options available are:

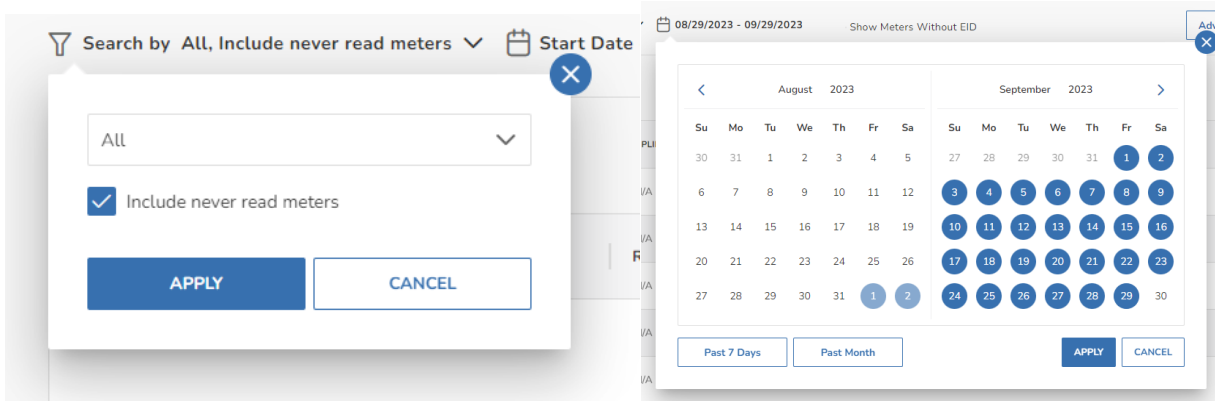

- Read Time
- Read
- Meter Status
- Comment Description
- Message to Office
- Read Method

### UNREAD METERS REPORT

The Unread Meters Report will display meters that have not been read during the date range selected.

5. (Optional) Check/uncheck the 'Include never read meters' box
6. Click **Apply**
7. Enter the **Date Range** for the report by selecting dates on the calendar or using the quick options 'Past 7 Days' or 'Past Month'.
8. Click **Apply**

**Harmony Encore – Apply Changes**

Search by options available include the following:

- All
- Route
- Meter Group

The following table provides descriptions of the fields available as columns in the Unread Meters Report.

Field	Description
<b>EID</b>	The Electronic ID of the meter
<b>Meter SN</b>	The serial number of the meter
<b>Account No.</b>	The account number associated with the meter
<b>Customer Name</b>	The customer's name on the account associated with the meter
<b>Address</b>	The address of the property associated with the meter (also known as the Service Address)
<b>Read Time</b>	The date and time of the last meter read
<b>Last Read</b>	Most current reading recorded for the meter
<b>Uplink RSSI</b>	The uplink Received Signal Strength Indicator (RSSI) of the meter
<b>Downlink RSSI</b>	The downlink Received Signal Strength Indicator (RSSI) of the meter
<b>Routes</b>	The route(s) associated with the meter
<b>Location Number</b>	The account number associated with the meter
<b>Route Numbers</b>	Route number associated with the meter
<b>Reception Quality</b>	The reception quality of the meter (No reception,
<b>Longitude</b>	The geocoded/provided latitude of the meter
<b>Latitude</b>	The geocoded/provided longitude of the meter

The Advanced Search options available are:

- Routes

**HI/LOW READS REPORT**

The Hi/Low Reads Report will display meters which have gone over their high limit or below their low limit.

<input type="checkbox"/>	ROUTES	LOW	HIGH	OUT OF RANGE READ (GALLONS)	CONSUMPTION (GALLONS, SINCE LAST BILLED READ)	EXCEPTION TYPE	READ DATE	LAST BILLED READ DATE

### MANUAL READS ONLY REPORT

There may be times (such as equipment failure) that you will need to read your meters manually. The Manual Reads Only Report will display meters that have been manually read in a date range. If a meter has had to be read manually more than once, it may need repair or replacement. This specifically indicates meters that were read manually and not by a radio device within the specified period.

#### Harmony Encore – Duplicate Meters Report

To generate a **Duplicate Meters Report**:

1. Go to **Reports > Infrastructure**
2. Select the **Duplicate Meters Report** at the top of the Infrastructure section
3. The **Duplicate Meters** Report will be generated automatically and display all duplicate meters in your system

The following table provides descriptions of the fields available as columns in the Static Meters Report.

Field	Description
<b>EID</b>	The Electronic ID of the meter
<b>Meter SN</b>	The serial number of the meter
<b>Customer Name</b>	The customer's name on the account associated with the meter
<b>Acct. No.</b>	The Account Number associated with the customer/meter
<b>Address</b>	The address of the property associated with the meter (also known as the Service Address)
<b>Last Read Time</b>	The date and time of the last meter read
<b>Last Read</b>	Most current reading recorded for the meter
<b>Routes</b>	The route(s) associated with the meter
<b>Location Number</b>	The Account Number associated with the customer/meter
<b>Route Numbers</b>	Route number associated with the meter
<b>Duplicates With</b>	The other meter that is listed as duplicate to this meter

**WORKING  
WITH ALERTS**

## WORKING WITH ALERTS

Adverse events, such as water leaks, trigger alerts in Harmony. These alerts can be viewed and handled in numerous ways.

### SETTING UP ALERTS

Define default thresholds, handling methods, and notification templates for alerts in the Alerts Settings area.

To set up alert parameters:

1. Go to **Settings > Alerts**
2. Under **Alerts**, there are 3 submenus: **Measurement issues**, **Negative Common Consumption**, and **Consumption exceptions** select one based on which alert you want to set up (See Table of Alerts below)
3. At the top of the Alerts Setting section, select the drop-down menu to select the specific alert you want to set up

The screenshot shows the 'Measurement issues alerts' configuration page in the WaterTown system. On the left is a navigation sidebar with 'ALERTS' highlighted. The main content area shows a dropdown menu for 'Tilt alert' with options: 'Tilt alert', 'Cut wire alert', 'Tamper alert', and 'Static alert'. Below this is a 'Generic parameters' section with a slider for 'Tilt alert (Days)' ranging from 0 to 60. The slider is currently set at 30 days. Below the slider, there are four severity level indicators: 'No notice' (0-4 days), '1' (5-14 days), '2' (15-29 days), and '3' (30-60 days). At the bottom are 'SAVE', 'CANCEL', and 'RESET' buttons. A note at the bottom states: '\*Tilt alert severity level is identified by the days with the alert was last received'.

**NOTE:** Disable new alerts – This does not disable the alert at the meter level but stops the alert from appearing in Harmony Encore.

Auto archive alerts will automatically archive alerts that are no longer being transmitted by the meter/data.

# **WORKING WITH FIXED NETWORK FUNCTIONS**

## WORKING WITH FIXED NETWORK FUNCTIONS

Customers who have meters connected to a fixed network can and sometimes must perform several tasks.

These tasks include:

### REQUEST AN ON-LINE READ

You can get a read from a meter on-demand by utilizing the On-Line Read Request.

To Request an On-Line Read:

1. Go to **Reports > Fixed Network**
2. The default selection should be **On-Line Read**
3. Click **'Send On-Line Read Request'**
4. **Enter the EID, Customer Name, Location, Account No., etc.** to search for the meter you want to request a read from
5. **Select the Meter/Account** from the search results
6. (Optional) You can select multiple meters to send an On-Line Read request to by repeating Steps 4 and 5 until you have selected the meters you want.
7. Click **OK**

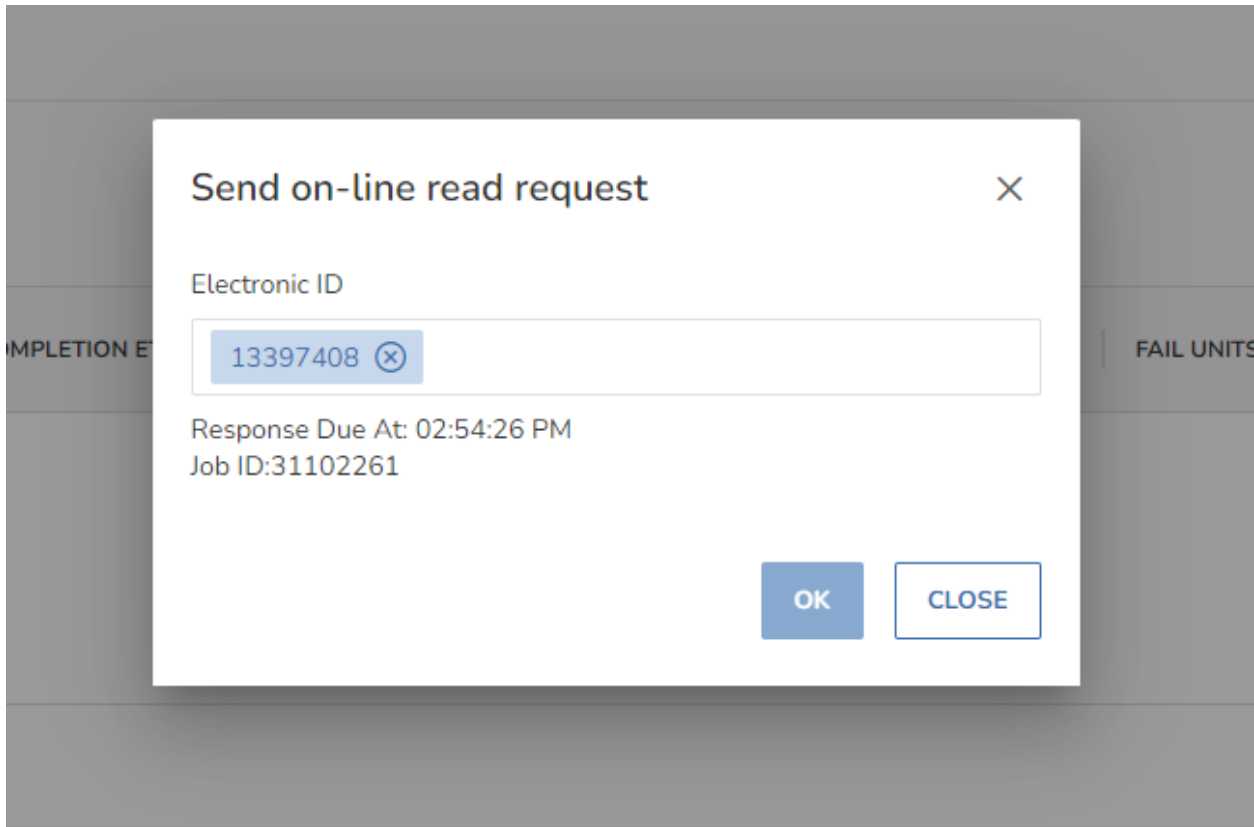

The screenshot shows the 'On-Line Read' menu item highlighted in a red box. Below it, the 'SEND ON-LINE READ REQUEST' button is also highlighted in a red box. The 'On-Line Read Jobs' table is visible below, with one job listed.

<input type="checkbox"/>	JOB ID ↓	REQUEST TIME	COMPLETION ETA	JOB STATE	NO. OF UNITS	SUCCESS UNITS	FAIL UNITS	PENDING UNITS
<input type="checkbox"/>	31102261	09/26/2023 02:46 ...	09/26/2023 02:54 ...	Pending	1	N/A	N/A	1

Page 1 of 1

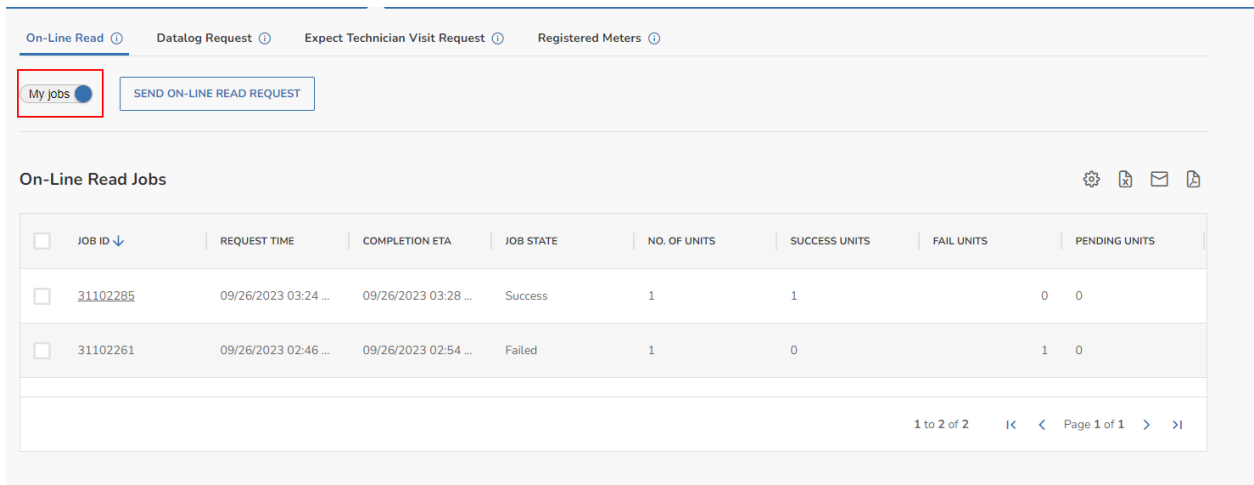

### Harmony Encore – On-Line Read

A job will be created to get the On-Line Read from the meter(s). This usually takes anywhere from 5-8 minutes and Harmony Encore will let you know when a response is due.

**Harmony Encore – Send On-Line Read Request**

Once a job has been created, you can view the job and job status in the table. You can toggle between 'My jobs', which show only the on-line reads you requested, or 'All jobs', which show all the on-line reads requested in your system.

**Harmony Encore – My Jobs**

You can also add/remove columns and export the report in Excel, PDF, or email as CSV. The following table provides descriptions of the fields available as columns in the On-Line Read Jobs table.

The following table provides descriptions of the fields available as columns in the On-Line Read Jobs table.

Field	Description
<b>Job ID</b>	The ID of the job created
<b>Request Time</b>	The time the job was requested
<b>Completion ETA</b>	The estimated time the job will be completed
<b>Job State</b>	The status of the job (Pending, Success, or Failed)
<b>No. of Units</b>	The number of meters requested in the job
<b>Success Units</b>	The number of meters that successfully completed an On-Line Read
<b>Fail Units</b>	The number of meters that failed an On-Line Read
<b>Pending Units</b>	The number of meters that are still pending in the job
<b>Requesting User</b>	The user who requested the job

## REQUEST DATA LOGS

Data Logs can be retrieved to view more granular reading data or fill in missing periods of reading history. You can request data log for a meter(s) by utilizing the Data log Request.

To Request a Data Log:

1. Go to **Reports > Fixed Network**
2. Select **Datalog Request** at the top of the Fixed Network section
3. Click **'Send Datalog Request'**
4. **Enter the EID, Customer Name, Location, Account No., etc.** to search for the meter you want to request a read from
5. **Select the Meter/Account** from the search results
6. (Optional) You can select multiple meters to send an On-Line Read request to by repeating Steps 4 and 5 until you have selected the meters you want.
7. Enter the **Start Date and Time** from when you want the meter data logs to start
8. Enter the **End Date and Time** to when you want the meter data logs to end
9. Select your **Reads Interval**
10. Click **OK**

End Date & Time

Reads Interval

**Harmony Encore – Send Datalog Request**

Once a job has been created, you can view the job and job status in the table. You can toggle between 'My jobs', which show only the on-line reads you requested, or 'All jobs', which show all the on-line reads requested in your system.

### Harmony Encore – My Jobs

You can also add/remove columns and export reports in Excel, PDF, or email as CSV.

Field	Description
<b>Job ID</b>	The ID of the job created
<b>Request Time</b>	The time the job was requested
<b>Completion ETA</b>	The estimated time the job will be completed
<b>Job State</b>	The status of the job (Pending, Success, or Failed)
<b>No. of Units</b>	The number of meters requested in the job
<b>Success Units</b>	The number of meters that successfully completed the Data Log
<b>Fail Units</b>	The number of meters that failed a Data Log
<b>Pending Units</b>	The number of meters that are still pending in the job
<b>Requesting User</b>	The user who requested the job

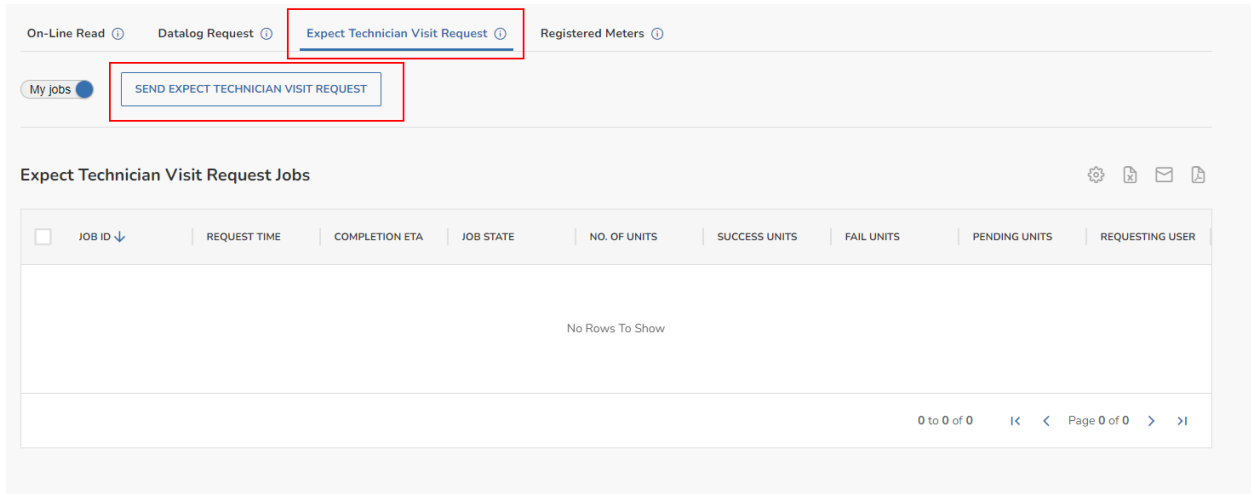

### EXPECT A TECHNICIAN'S VISIT

When a meter is connected to a base station, it cannot be read via drive-by. If a technician needs to visit a meter and read it, follow these steps to disconnect the meter from the base station during a designated time.

To Expect a Technician's Visit:

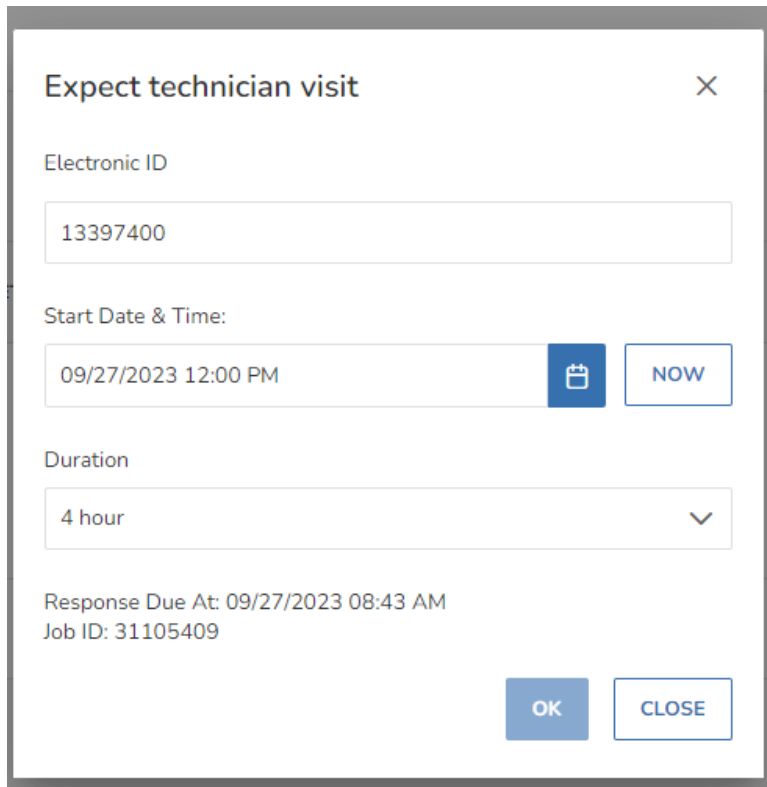

1. Go to **Reports > Fixed Network**
2. Select **Expect Technician Visit Request** at the top of the Fixed Network section
3. Click **'Send Expect Technician Visit Request'**
4. **Enter the EID, Customer Name, Location, Account No., etc.** to search for the meter you want to request a read from
5. **Select the Meter/Account** from the search results
6. Enter the **Start Date and Time** from when you want the meter to go into 'drive-by' mode

7. Select the **Duration** you want the meter to stay in 'drive-by' mode before it reconnects to the base station/repeater
8. Click **OK**

**Harmony Encore – Expect Technician Visit Request**

A job will be created to send the Expect Technician Visit Request to the meter. Harmony Encore will let you know when a response is due.

**Harmony Encore – Expect Technician Visit**

Once a job has been created, you can view the job and job status in the table. You can toggle between 'My jobs', which show only the Expect Technician's Visit you requested, or 'All jobs', which show all the Expect Technician's Visit requested in your system.

Search by options available:

- All
- Base Station ID
- Repeater ID

The following table provides descriptions of the fields available as columns in the Registered Meters Report

Field	Description
<b>EID</b>	The Electronic ID of the meter
<b>Meter SN</b>	The serial number of the meter
<b>Base Station</b>	The Base Station ID the meter is registered to
<b>Repeater</b>	The Repeater ID the meter is registered to
<b>Last Registration</b>	The date and time the meter last registered to the base station/repeater
<b>No of Registration</b>	The number of registrations for the meter
<b>Uplink RSSI</b>	The uplink Received Signal Strength Indicator (RSSI) of the meter
<b>Downlink RSSI</b>	The downlink Received Signal Strength Indicator (RSSI) of the meter
<b>Address</b>	The address of the property associated with the meter (also known as the Service Address)
<b>Longitude</b>	The geocoded/provided longitude of the meter
<b>Latitude</b>	The geocoded/provided latitude of the meter

The Advanced Search options available are as follows:

- Number of Registration
- Uplink RSSI
- Downlink RSSI

# **GLOSSARY**

## GLOSSARY

- **Advanced Metering Infrastructure – AMI**  
Integrated system to collect and transmit meter data through two-way communication.
- **Automated Meter Reading – AMR**  
System where meters are read electronically either by a walk-by or drive-by method.
- **Billing Import**  
A process of importing meters and demographic data from a billing software into an MDM (Harmony Encore).
- **Billing Export**  
A process of exporting readings data to a billing software.
- **Billing Software**  
A software system which utilizes MDM (Harmony Encore) data to bill a customer. Sometimes referred to as Customer Information System (CIS).
- **Customer Information System (CIS)**  
A software system which utilizes MDM (Harmony Encore) data to bill a customer. Sometimes referred to as Billing System.
- **Data Log**  
Readings and alerts data stored in the meter's memory. Data logs can be retrieved to view more granular reading data or fill in missing periods of reading history.
- **Drive-by System**  
Alternative naming for an AMR system in which a meter's data is electronically collected by a vehicle driving by them.
- **Fixed Network**  
Alternative name for an AMI network – Network to collect meters' data.
- **Geographic Information System – GIS**  
A system that creates, manages, analyzes, and maps all types of data. In our software it displays the meters and communication devices over a map.
- **Harmony Mobile**  
Master Meter's software for AMR systems.
- **Main Meter**  
The primary meter for a building that has submeters.
- **Meter Data Management – MDM**  
A software system that performs long-term data storage and management for data delivered by smart metering systems. The software manages meters and meters' reading data, alerts, consumptions, etc.

- **Microsoft Azure**  
Microsoft's cloud hosting service. Harmony and Encore are hosted in Azure.
- **Routes**  
A group of meters maintained by the billing software. Each meter is part of a route.
- **Software as a Service – SaaS**  
A software licensing and delivery model in which software is licensed on a subscription basis and is centrally hosted. Harmony and Encore are SaaS systems.
