

Advanced Browser-Based Utility Billing Software from Master Meter Systems

What You've Been Waiting For

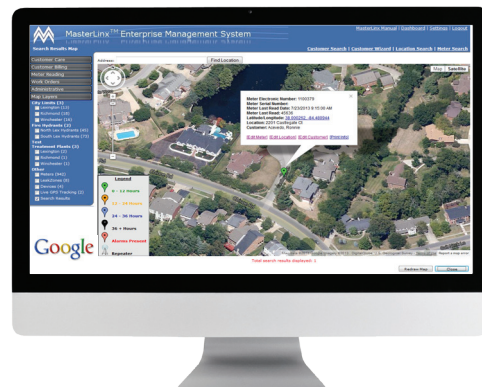

Master Meter Systems, formerly Greentree Applied Systems, has announced the launch of our newest billing software package, MasterLinX Enterprise Management System. This system can support any utility from the smallest apartment complex to the largest public utility. MasterLinX integrates with all major meter reading systems and most major accounting packages. Master Meter Systems' investment in MasterLinX represents years of development based on our long experience working with the utility industry, and broad software development and support teams dedicated to continuous product evolution, improvement and support.

MasterLinX is a web application hosted on servers at our secure data center. You can access the system from any internet connected computer. There is no need to worry about installing programs or backing up data, and you will have easy access to customer support. Beginning in late 2013, you will have the option to host this program at your local site.

Great software begins with great people – those who run your utility and those you entrust to integrate your system. We take great pride in understanding your utility and its unique challenges. Choosing MasterLinX Enterprise Management Systems provides a leap forward in performance, features, and flexibility.

Please visit our website, MasterMeterSystems.com to learn more, or call us today to schedule an online demonstration of our software.

New Software Features!

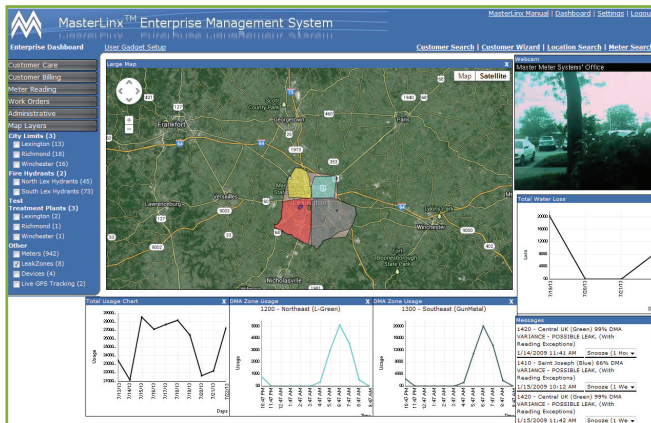

Features & Benefits:

- Manage customers, locations, and meters with our tabbed interface
- Bill for unlimited metered and non-metered services
- Configurable late fee methods
